

Description of subject product

1. The products covered by this investigation are certain flat-rolled steel products, either electrolytically or otherwise plated or coated with zinc or zinc-alloys, whether or not corrugated. The products include products in coils and not in coil regardless of thickness and width.

2. Steel products included in the scope of these investigations are products in which:
 - (1) iron predominates, by weight, over each of the other contained elements;
 - (2) the carbon content is 2 percent or less, by weight; and
 - (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated: 2.50 percent of manganese, or 3.30 percent of silicon, or 1.50 percent of copper, or 1.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 2.00 percent of nickel, or 0.30 percent of tungsten, (also called wolfram) or 0.80 percent of molybdenum, or 0.10 percent of niobium (also called columbium), or 0.30 percent of vanadium, or 0.30 percent of zirconium.

3. Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

4. The following products are specifically excluded from the scope of this investigation:

5. Flat-rolled steel products either plated or coated with zinc-aluminium-magnesium alloys, which exceed 2.0 percent of magnesium, are outside of the scope of this investigation.
